As seen by the naked eye...

As seen by a thermal  
weapon sights...

- Use with AN/PAS-13, TWS, and other thermal sights
- Reverse polarity material and included chemical heater create a clear thermal signature
- Aim point is a hot square in the middle of the target for precise aiming
- Used just like a standard 25m target
- Works in all environments, inside, outside, cloudy, sunny
- Easy to use

Infrared Tools LLC is a veteran owned small business having extensive experience with military infrared signage and marking systems. We look forward to serving you.

CaTTIS I	CaTTIS II
Works in all environments	Works in most environments
Compact, but thicker than CaTTIS II	Very light and compact

Buy a mixture of both targets. CaTTIS I will never fail you, but it is a little larger. CaTTIS II will save on money and logistics. Use CaTTIS II most of the time and use CaTTIS I when the environment dictates so. (Overcast, indoors, etc.)
