Infrared Tools Classic Thermal ID panels

- Available in Desert Tan and OD Green
- Constructed to the same or better optical and structural standards as other thermal ID panels
- The 2 ft X 2 ft Thermal ID Panels are available with a 500 denier nylon, ACU digital camouflage, pouch with MOLLE attachments
- Significantly quieter than other panels improving soldier safety
- Significantly darker than that of other manufacturers when imaged for easier identification
- Infrared Tools also manufactures XTIP panels with multiple layers of no power film for cost savings and improved safety and logistics
