Field Renewable Thermal ID Panels

- Works just like a standard Thermal ID panel but lasts 4 times as long
- Multiple layers of tan "No Power Film" allow you to have 4 new panels in the space of one
- When the top layer is worn or damaged, rip it off to reveal a fresh layer
- Tan, 2' X 2' size with 8 grommets
- Patent Pending

Benefits of the XTIP

- Logistics are easier with fewer panels to transport
- Safer because you always have a good panel
- Better value because of lower production cost per layer

Part No.	Description	Size
XTIP-15-S2NT	Personal Panel (Tan front/org back)	2' X 2'

Infrared Tools LLC is a veteran owned small business with extensive experience with military infrared signage and marking systems. All panel manufacturing is done in a HUB Zone. Panels are not made by Night Vision Systems. We look forward to serving you .
